

*Polymer modification is a KEY to innovative composite materials development.*

*Full custom-made product modification available for the best match with your technical challenge.*

---

## *Graft Polymer products for the Anticorrosive Coating Market.*

---

- ❖ **IPN type adhesive for pipe coating**
  - GRAFTABOND RPC (granules & powder forms)
  
- ❖ **Graft polymers on the base of;**
  - PE, PP, EBA, EVA, EPDM as components of adhesive systems for the pipe coating.
  
- ❖ **Grafted waxes on the base of;**
  - PE, PP as component of “Hot-Melt” for pipe coating.
  
- ❖ **Graftamid EB-PA**
  - Line of products as components of adhesives (high temperatures).
  
- ❖ **Graftalen MP-UHHD - UHPP**
  - As impact enhancer for PE PP coat.
