

❖ Rigid PVC (impact modification):

- GRAFTABOND EV-MMA/GMA
- GRAFTABOND CP-MAH

❖ Thermo – reversible crosslinking

- PE or PP formulation
With high service temperature
completely recyclable.

*Polymer modification is a
KEY to innovative
composite materials
development.*

*Full custom-made product
modification available for
the best match with your
technical challenge.*

*Graft Polymer products for the Pipes
Market.*

❖ HDPE 100 piping (→ PE 125):

- GRAFTALEN MP-UHHD (up to 30%)
- GRAFTALEN HD-AR (abrasion resistance polyethylene)

❖ High melt strength PP:

- GRAFTALEN MB-HMSPP (MFI - 1)
Dosage 5-10% into pure PP.
