

HFFR ADDITIVES

GRAFTASYNT™ HFFR

Liquid type

- ✓ For Thermoset and Liquid polymeric systems: PU, Epoxy, Polyesters, Acrylic, Paints & Coating.
- ✓ In case of capability to dose liquid possible to use as well in: PA, TPU, PET, PBT, PC, PVC
- ✓ Dosage: 5%-15%

GRAFTASYNT™ HFFR 23570 PD

Crystals type (not a filler)

- ✓ For engineering plastics: PA, PET, PBT, PC Etc.
- ✓ Can be used as a synergistic component in cable compounds with MH and/or ATH, to reduce inorganic filler levels
- ✓ Dosage: 5%-15%

GRAFTASYNT™ HFFR 484PO PD

White Powder

- ✓ Designed to reduce flame propagation in plastics (PP, PE) and coating.
- ✓ Dosage: 15%-25% **(Depends on the compound type and filler content)*
