

## Melt Flow regulator for PP

### GRAFTALEN MB EB-150DC05/10

Designed to increase melt flow of polypropylene and polypropylene compounds (scrap/virgin). Can be used to decrease the MFI of the PE compounds.

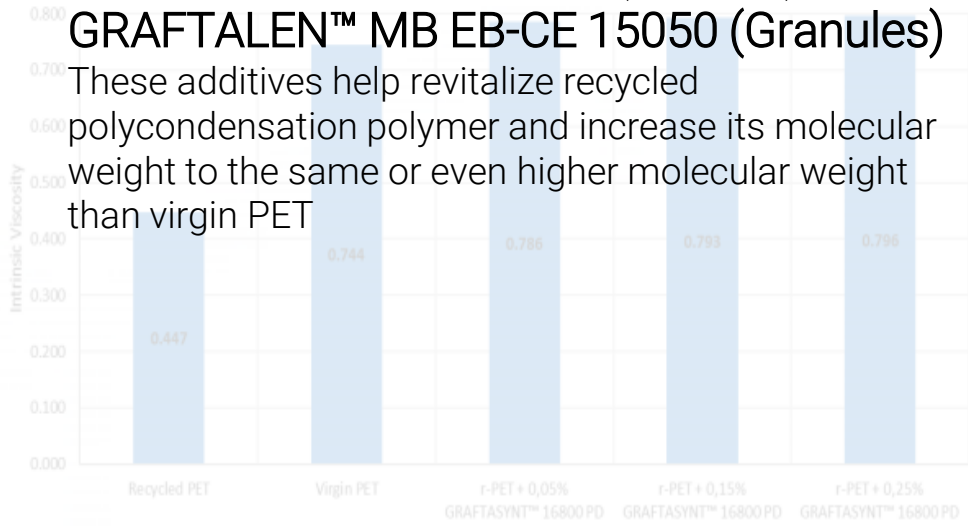

## Chain extender for polycondensation scrap

PET, PBT, PC

### GRAFTASYNT™ 16800 PD (powder)

### GRAFTALEN™ MB EB-CE 15050 (Granules)

These additives help revitalize recycled polycondensation polymer and increase its molecular weight to the same or even higher molecular weight than virgin PET

Recycling Sector  
custom-made products based  
on client requirements.

Polymer modification is a  
KEY to innovative  
composite materials  
development.

## Compatibilizers for Scrap

### GRAFTABOND™ ECO-RM 00325 C

Compatibilizers for mixed colored scrap  
PE, PP, PA, EVON, FILLERS etc.

### GRAFTABOND™ ECO-RG 00525 C

Compatibilizers for mixed polyolefin – polyester scrap  
PE, PP, PET, PBT, PC etc.

### GRAFTAKIT™ ECO 00750 IM

Is a reactive masterbatch, designed to greatly improve impact strength of mixed polyolefin scrap.

### GRAFTABOND™ LL-MAH 00230 C

Is an LLDPE based compatibilizer for virgin & recycling polyethylene compounds and blends.

## Melt Flow enhancer for PE

### GRAFTALEN™ SA (powder)

Is an additive for polymers, used for regulating rheological properties
